CONTENTS

Special Issue

Abstracts of the 11th International Symposium on Atherosclerosis, Paris, 5–9 October 1997

* after an abstract number indicates a young investigator award finalist, poster separately displayed

Sunday 5 October 1997

State of the Art Symposia abstracts
Clinical event reduction: The true objective 1
Frontiers in atherosclerosis research 1
Molecular mechanisms of fibrate action: Pharmacological and clinical application 2

Monday 6 October 1997

Conference abstracts
Genetics 5

Educational Lecture abstracts
New approaches to vascular and lipid disorders: From genes to therapy 7

Workshop abstracts
W01 Extracellular matrix of the vessel and cell–matrix interactions during atherogenesis 8
W02 Restenosis and remodeling 9
W03 Development and progression of the atherosclerotic lesion 10
W04 Epidemiology: New risk factors 11
W05 Molecular genetics of atherosclerosis 12
W06 Lipoprotein oxidation and atherosclerosis 13
W07 Nutrition and CHD 14
W08 Lp(a) and athero-thrombosis 15
W09 Debate: LDL vs triglyceride-rich lipoproteins 16

Poster abstracts
Apolipoproteins 17
Lipases 22
Lipid absorption, cholesterol and bile acid metabolism 28
Transgenic animal models 32
Animal models 36
Gene therapy for cardiovascular diseases 41
Dyslipoproteinemias 42
Clinical trials (prevention, regression) 45
Hypolipidemic treatments 53
Genetics (human) of atherosclerosis and lipoprotein disorders 64
Genetic epidemiology 75
Epidemiology 84
Haemodynamics / rheology 92
Hypertension 95
Methods 100

Tuesday 7 October 1997

Conference abstracts
Epidemiology, nutrition, pharmacology 103

Educational Lecture abstracts
Omega 3 fatty acids new insights: From fundamental data to the chemical 105

State of the Art Symposia abstracts
Heart and brain 106

Workshop abstracts
W10 Growth factors, cytokines and vasoactive peptides 107
W11 Epidemiology: Geographical variations of cardiovascular incidence and risk factors 108
W12 Gene therapy of atherosclerosis and restenosis 109
W13 Molecular genetics of monogenic disorders of lipoprotein metabolism 110
W14 Coagulation and fibrinolysis 111
W15 Triglyceride-rich lipoproteins 111
W16 Hormonal replacement therapy of menopause and atherosclerosis 113
W17 HDL / reverse cholesterol transport 114
W18 Lipoprotein–cell interactions 115

Poster abstracts
Molecular insights into HDL and its properties 117
Lipid-lowering drugs 118
Lp(a) 136
Risk factors (for cardiovascular diseases) 152
Risk factors in the elderly 172
Menopause 175
Women and cardiovascular disease 179
Platelets in atherogenesis 182
Thrombosis and hemostasis 187

Wednesday 8 October 1997

Conference abstracts
Arterial wall – atherogenesis 197

Educational Lecture abstracts
New insights into the mechanisms and therapeutic approaches in atherosclerosis 198

Poster abstracts
Antioxidants 199
Lipid peroxidation 209
Modified lipoproteins 219
Macrophages and atherosclerosis 228
Endothelium and plaque stability 238
Endothelial cells 238
Smooth muscle cells and atherosclerosis 248
Vascular biology 254
Vessel wall matrix 258
The silent stage of cardiovascular diseases 261
Restenosis 263
Vascular imaging 268
Growth factors, cytokines and vaso-active peptides 272
Inflammatory and immune responses in atherosclerosis 277

Thursday 9 October 1997

Conference abstracts
Lipoprotein metabolism 285

Educational lecture abstracts
Community prevention programs 287

Workshop abstracts
W19 Cellular and haemodynamic regulations of endothelial functions 288
W20 Immune and infectious factors in atherogenesis 289
W21 New development in animal models for atherosclerosis 290
W22 Genetic epidemiology of CHD and its risk factors 290
W23 Insulin resistance and lipoprotein metabolism 291
W24 Platelets 292
W25 Molecular insights into HDL and its properties 293
W26 Non-invasive assessment of atherosclerosis 294

Poster abstracts
Development and progression of atherosclerotic lesions 296
Diabetes and insulin resistance 304
Obesity 318
Nutrition / diet (and bioactive components of food) 324
Post-prandial lipemia 336
Triglyceride-rich lipoproteins 343
Lipoprotein metabolism 348
Lipoprotein receptors 357
HDL / reverse cholesterol transport 364
Multiples roles of apo E 377
Miscellaneous 381

Author index 387
